

Task 5:

1. Log in as customer0 and go to Home!
2. There is an unload picture with the title “Awesome product”
If you click on the image, the picture is not available.

This is the url of this image: <https://a5ee1462-cd85-48ca-9767-ba452b40b1cf.i.vuln.land/post-images/http://localhost:8765/file001.jpg>

3. Go to community and try to upload the image from url!
It doesn't work!
4. There is a problem with the ip!

Try this:

<http://127.0.0.1:8765/file001.jpg>

This works because, 127.0.0.1 is the ip from localhoast!

Finally try this to get the passwords: <http://127.0.0.1:8765/file002.jpg>

Oh hello there. This is my secret lair where I hoard all the important passwords for the Emil admins.
This site is super secure because it's not directly reachable from the internet!
